

Family & Community Support Systems, LLC

Parent Coaching

Our Parent Coaches meet with you in the privacy and convenience of your home to provide expertise and unconditional support. We can help you select real solutions for your family and build on your family's strengths and values. You purchase the package that works for you.

What is Parent Coaching?

- Helps you clarify the principles that guide your parenting
- Supports you to face challenges with creativity and conviction
- Assists you in identifying your unique parenting strengths and how to maximize them
- It's about you, your needs, your situation, your solution
- It's about now... you'll move to immediate action
- Unlike classes, books, and TV talk shows, we tailor our coaching to your unique life

Our technique is based on the clinically-proven understanding that a happy, well-adjusted parent is the strongest influence on raising a happy, well-adjusted child.
